Year	Degree/Exam	Institute	CGPA/Marks
2023	B.Tech	National Institute of Technology Jaipur (NIT JAIPUR)	8.6/10

PROFESSIONAL SUMMARY

Software engineer with 3+ years in Python, C++ and Java, focused on bug fixing, feature implementation, codebase refactoring, and performance optimization in large-scale distributed systems. Hands-on with GenAI and LLM tooling — building AI agents, integrating LLM APIs, and running prompt engineering and evaluation. Strong in algorithms and data structures, with a record of debugging complex issues and shipping maintainable code through rigorous code reviews.

WORK EXPERIENCE

Senior Software Engineer at Freshworks

Mar '26 - Present

- **Built** GenAI tooling and **AI agents** integrating **LLM APIs**, including an AI Slack agent for AWS budget alerting, applying **prompt engineering and evaluation** to deliver reliable, automated workflows.
- **Implemented** a Python feature to enforce mandatory resource tagging across org for improving governance, maintainability, and cost attribution across services.
- **Refactored** alerting configuration through an alert-inventory audit, shipping changes via **pull requests and code review**, and executed a EKS upgrade (1.31 → 1.35).

Software Engineer II at Zuora

Jan '23 - Mar '26

- **Developed** Python automation and tooling to deploy and manage monitoring agents across **1000+ AWS EC2 instances**, achieving **100% telemetry coverage** while optimizing observability costs by **60%+**.
- **Implemented** event-driven Python services on **AWS Lambda** to enforce governance across **S3, RDS, ElastiCache, Kinesis, and Flink**, achieving **100%** compliance detection.
- **Built** automated CI validation pipelines that caught syntax, DNS, and configuration defects before deployment, improving code quality and reducing production misconfigurations by **40%**.
- **Delivered** the Japan data center expansion by deploying and debugging **125+ Kubernetes microservices** via Zuora's internal platform, configuring API Gateway routing and resolving multi-service issues for a rollout recognized by leadership.
- **Optimized** EC2 performance and cost through migration from x86 to AWS Graviton, achieving **20% savings**.

PROJECTS

Incident Response Automation | AWS Lambda, Python, Terraform

Jan'25 - Feb'25

- **Developed** an event-driven alerting and remediation system using **AWS CloudWatch, Lambda, and PagerDuty** to auto-resolve common infrastructure issues like disk-full and memory spikes.
- **Implemented** Python-based auto-remediation logic to clean logs, restart services, and notify engineers, reducing MTTR by **50%**.
- **Provisioned** all resources with **Terraform**, integrating on-call workflows with PagerDuty escalation policies and alert thresholds.

Resilient Kubernetes Platform with GitOps Automation | In Progress

Mar'26 - Present

- **Building** a self-healing Kubernetes platform on **AWS EKS** using **Helm, GitHub Actions, and ArgoCD** for automated GitOps application delivery.
- **Integrated Prometheus and Alertmanager** to detect production failures and trigger automated GitOps syncs and auto-scaling actions, boosting uptime by **40%**.
- **Implementing Sealed Secrets** and centralized config management for secure, auditable, and consistent multi-cluster deployments.

SKILLS AND EXPERTISE

- **Programming Languages** - Python, C++, Java, Bash, Groovy, YAML, JSON, HCL (Terraform)
- **Core Software Engineering** - Algorithms, Data Structures, Performance Optimization, Bug Fixing, Feature Implementation, Codebase Refactoring, Debugging, Maintainability, Code Review
- **GenAI & LLMs** - LLM APIs, AI Agents, Prompt Engineering, LLM Evaluation, AI-assisted Tooling
- **Systems** - Distributed Systems, Large-scale Codebases, Linux Systems, Git/GitHub, REST/API integration
- **Cloud & CI/CD** - AWS, Kubernetes, Docker, Terraform, Jenkins, GitHub Actions, Prometheus, Grafana
- **Soft Skills** - Clear written/verbal communication, collaboration, ownership, analytical thinking, attention to detail

ACHIEVEMENTS

- **Secured AIR 4179** in **JEE Advanced 2019**, ranking in the top **0.1%** among 1M+ candidates.
- **Achieved AIR 2** in the **Regional Mathematics Olympiad (RMO) 2017**, demonstrating strong mathematical aptitude.
- **Finalist** in HackOn with Amazon out of 2,300+ teams.
- **Winner** of internal **Capture the Flag (CTF)** cybersecurity competition, demonstrating expertise in identifying vulnerabilities.
